<small>The specified values were determined in accordance with prescribed measuring processes (Section 2, Nos. 5, 6 and 6a of the latest version of the German Energy Consumption Regulation for Passenger Cars). CO<sub>2</sub> emissions arising as a result of the production and provision of fuel or other energy sources are not taken into account when determining the CO<sub>2</sub> emissions, as per Directive 1999/94/EC. The information does not relate to an individual vehicle and does not constitute part of the offer, but rather is intended solely for the purpose of comparing different vehicle types.</small>							
<small>Notes on the 1999/94/EC Directive</small> The fuel consumption and CO <sub>2</sub> emissions of a vehicle not only depend on the efficient use of fuel by the vehicle, but are also influenced by the driving style and other non-technical factors. CO <sub>2</sub> is the greenhouse gas primarily responsible for global warming. Guidelines on the fuel consumption and CO <sub>2</sub> emissions of all passenger car models available in Germany are available free of charge at all points of sale in Germany where new passenger car models are displayed or offered for sale.
